

# Australian Rolling Stock Standards AS 7529.4 Rolling Stock Fire Safety - Track Machines

STANDARD

## Important Notice and Disclaimer

The Rail Industry Safety & Standards Board (RISSB) provides a range of template products, collectively called the 'RISSB Products', including:

- Standards;
- Codes of Practice;
- Rules;
- Guidelines; and
- Handbooks.

The purpose of RISSB's Products is to provide general good practice guidance for use by organisations engaged in, or providing services to those engaged in, railway operations in Australia (the 'Users').

RISSB Products have not been tailored to fit or address the individual circumstances of any organisation. They are adopted by Users at their own risk.

Responsibility rests with the User, should it choose to adopt a RISSB Product, to ensure that the RISSB Product is safe for use in the specific User's operations.

This will include undertaking a risk assessment. Reliance must be placed on the User's own enquiries and assessment rather than the RISSB Product.

RISSB and all persons acting for RISSB in preparing a RISSB Product disclaim any and all liability or responsibility to any person for any consequences arising directly or indirectly from the use by Users of the RISSB Product in whole or in part, and whether or not in conjunction with, or as a supplement to, the guidelines which the Users currently use.

Adherence to the RISSB Products does not ensure compliance with any relevant law, national guidelines, standards and codes of practice.

Due to the diverse operating environments within the rail industry, strict and technical compliance with RISSB Products may not always be possible by organisations.

Users are responsible for making their own enquiries in relation to compliance with national standards, guidelines and codes of practice.

While all reasonable care has been taken in the preparation of RISSB Products, RISSB is an industry association, not a legal practitioner, and therefore it makes no representation that, and gives no warranty or guarantee that, RISSB Products are an accurate representation of the law or fit for any individual circumstances. RISSB (including all persons acting for, or on behalf of, RISSB in preparing and/or publishing RISSB Products) does not take any responsibility for loss or damage suffered by any person resulting in any way from the use of, or reliance on, RISSB Products.

Australian Rolling Stock Standards AS 7529.4 Rolling Stock Fire Safety - Track Machines  
Preview

## 1 PREFACE

---

The aim of this Standard is to outline requirements to provide the minimum level of fire safety for all rolling stock operating in Australia.

For the purposes of this Standard, all clauses containing the term 'shall' are considered mandatory requirements; all clauses containing the term 'should' are considered recommendations, and all other clauses are explanatory statements. This Standard also highlights recommended and mandatory sections with (R) and (M) respectively alongside the paragraph number.

All RISSB standards provide controls for hazards contained in RISSB's hazard guideline. In this particular standard, the reference number of the hazard being addressed is identified in brackets at the end of each sentence (where appropriate). RISSB's hazard guideline can be found on the RISSB website at [www.rissb.com.au](http://www.rissb.com.au).
